OPUS INTERACTIVE CREATES AND HOSTS SAAS SOLUTION
*Helps Cornerstone Revolutions web-enable their
PowerAdvisor Portfolio Management system*

Portland, OR, October 9, 2009 – Opus Interactive, a leading business and agency SAS 70 Certified hosting provider, and the only independently owned virtual solutions provider in the Portland metro area, today announced that it has successfully web-enabled Cornerstone Revolutions PowerAdvisor Portfolio Management system.

Located in Portland, Oregon, Cornerstone Revolutions, Inc. is a software firm specializing in user-friendly, affordable applications and services for independent investment professionals. PowerAdvisor is Cornerstone's flagship product for portfolio management, performance measurement, and reporting.

In order to adequately compete with other vendors within their market-space, Cornerstone needed to make its software product available as an online solution, capable of providing the same level of accessibility, reliability, and security that users of the desktop model enjoyed. They turned to Opus Interactive. "We looked at several other vendors for data hosting, and determined that Opus was the best fit for our needs," stated Mary Hepler, President and CEO of Cornerstone. "Key factors in our decision to move forward with Opus included their very knowledgeable support, their highly secure virtual environment, and extremely competitive pricing of hosted services."

"Together we were able to create a Software-as-a-Service application delivery solution hosted on virtual servers that offers an application once accessible only on the desktop to any end user via the Internet," said Eric Hulbert, CEO of Opus Interactive.

About Opus Interactive

Portland, Oregon based Opus Interactive is a full-service Managed Services Provider (MSP). Founded in 1994, the company provides managed hosting, dedicated virtual and standard servers, collocation, and hi-capacity Internet services. With its unique high density data center model, advanced technology adoption, clean power utilization, and energy efficient hosting solutions, Opus Interactive works with organizations of all sizes helping them reduce IT infrastructure costs and consolidate their server footprint. They team with industry leading partners such as VMware, HP, LeftHand Networks, and Microsoft. Opus Interactive is SAS70 Certified and an accredited member of the International Managed Services Provider Alliance.
