

TECHNOLOGY | *Solutions*

Kara Hooper, owner of KLH, has a Bachelor's degree in computer science and mathematics. She has over ten years of experience as a web, database & application solution provider. This has included custom web design & development, programming, corporate identity design, shopping cart solutions & more. Kara has maintained numerous websites and worked with a wide variety of web technologies.

KLH Technology Solutions has been in business for over 7 years. We provide web design, database development, graphic design, custom application programming, online marketing and search engine optimization. Other solutions include web hosting, ecommerce, merchant accounts and more. KLH provides ongoing maintenance & services to help improve and grow your business.

Let KLH be your professional partner to help you increase your business productivity through the latest technology, organization and integration. We offer a personalized service catered to your needs.
