SEARCH ENGINE OPTIMIZATION (SEO)

SEO is one of the most important aspects that needs to be considered for your online business. Website optimization includes an analysis of your site, keyword & competition research, relevant descriptions created for images & pages, html validation, sitemap creation, analytics reports, and more. SEO will help rank your website higher in search engines to increase your web traffic. One time initial SEO and monthly SEO service available.

BLOG

Setup & install a blog on your website to help increase your website traffic and keep fresh content online. A blog written in 2-5 times/week or once a day can help your SEO by:

- Helping your company find its niche
- Increase the traffic coming to your site
- Sending your depth of content and page rank soaring
- Make you a fast friend of the search engines

GRAPHIC DESIGN SERVICES

Professionally designed marketing tools for your business.

Corporate Identity Package - business card design, letterhead design, and informational brochure design.

Logos - Designing your company's logo is one of the most important steps in your branding efforts. We provide professionally custom designed logo's to fit into your branding and marketing strategy.

Newsletters - The design of your newsletter is critical and should reflect your corporate style and the image you wish projected. We can develop a totally new, custom designed newsletter or improve an existing publication. We'll make sure your newsletter design communicates who you are while effectively communicating your message. If you need content developed we can create that for you as well.

EMAIL TEMPLATE

KLH Technology Solutions will create a unique template that reflects your business or organization. We can create a custom look and feel for your email marketing efforts.
